1.2. Hands-on scenario

Create a shared category called Application Reports for your access group. Place the summary report created in above example (case count based on status) in the shared category. Validate that above category and report within it is not available for other access groups.

Create a standard category called Operation reports. Place the summary report created in first exercise (operator count based on access group) in the standard category. Validate that above category and report within it is available for all access groups.
